- Designed and implemented a new user interface for a software applicationDemonstrated proficiency in Java programming and UI design principles
  - Improved user interaction and overall software experience
  - Reduced development time by 15% through efficient coding practices
  - Created a PDF bill generator using Java
  - Developed a bill generator with Python and Tkinter GUI

## ACHIEVEMENTS

- Hackathon Grand Finalist(2023):**
- Staffscan is an employee management and attendance tracking web application that I built using Django. It allows admins to track attendance, leaves, departments, and other employee data. Key features include:
  - Employee profiles and database
  - Attendance marking with date/time stamps
  - Dashboard analyzing attendance.
  - Leave applications and approvals workflow
  - Multiple admins have multiple employees without affecting there data conflicts.
- Worked on Real Time Projects**
- Solved complex technical challenges to deliver high-quality projects that exceeded client expectations, fostering long-term relationships.
